

Who are we?

Forum for people professionally involved in biosafety with the aim to exchange experience, developments and issues in biosafety practices and regulation in a Belgian context .

BBP is a local working group within the European Biosafety Association (EBSA) Currently representing over 90 Biosafety professionals affiliated either in Belgium or Luxembourg (status February 2024).

What do we do?

- Promote awareness, knowledge and understanding of biosafety at regional/national Belgian level, thereby contributing to the European context
- Establish and communicate "Good Practices" with our members
- Stimulate dialogue and discussion on new biosafety topics
- Develop and provide biosafety training material and activities
- Act as "focal point" for the collection of standpoints in relation to the development of regulation and standards on biosafety, biotechnology, transport and related activities
- Contribute to the practical implementation of regulations and ensure that new standards are science-based and represent "good practices"
- Represent those active in the field of biosafety and related activities
- Represent the members' interest on all aspects of biosafety aiming to prevent damage to humans and the environment caused by biological material

Contact : bbp@ebsaweb.eu

What's in it for you as a member?

- Training :
 - Symposia (Entry fee at 50% reduction)
 - Workshops (Free admission)
- BBP Flash: Information on biosafety issues & developments
- Have a voice in determining positions
- Meet colleagues and experts
- Share good practices
 - Practical posters and guidance documents
 - Flowcharts

BBP Steering Team

- 5 members
 - 1 president, 1 secretary, 3 steering team members
 - 2-year mandate, elected by BBP members
- Monthly meetings
 - mainly by videoconference,
 - also attended by guests (e.g. former ST members,...)
- Main language: English

Task forces & contact points

- Waste
- Biosafety Practices
- Risk Assessment
- Regulation
- Biosafety profession
- Movement of biological materials
- Biocides
- High containment

In consultation with Belgian authorities and technical experts.
