10.45 - Implementation of a risk assessment system in practice (*tbd, J&J*)
11.15 - Case studies to help you find your way in the 'risk assessment landscape'
12.45 - Conclusions
13.00 - Sandwich lunch

The ins and outs of risk assessment

Risk assessments are the foundation of every (bio)safety program. In spite of the general acceptance of this approach, many professionals have great difficulty to find a suitable methodology for performing the risk assessment with sufficient confidence.

During a half-day workshop you will be briefly introduced to the ins and outs of risk assessment, hear about the practical implementation of a risk assessment system and have plenty of opportunity to practice risk assessment in groups by means of case studies and an interactive discussion.

Workshop organized by and for the
Belgian Biosafety Professionals
